

# LEMAG<sup>®</sup>

## PRESSOTEST<sup>®</sup> HP

- Sealed construction
- Up to 1000 bar
- Lightweight, hand held
- Optional over pressure protection system
- High pressure / Priming selector
- Large see-through reservoir
- Compatible with many different liquids
- Calibration certificate according to ISO 9001 standard

A solid, easy to use pressure test system for oil, water and other liquids

The LEMAG Pressotest<sup>®</sup> HP is lightweight, easy to use and can generate pressures up to 700 bar (1000 bar option). It is well suited to calibration of pressure transmitters, pressure transducers, pressure switches and pressure gauges.

The system offers optional adjustable over pressure protection, fine control and a unique selector switch to move from priming to high pressure generation.

### Scope of supply

- Hand pump
- Digital Manometer
- A set of adapters
- A flexible hose with fast couplings
- A robust carrying case

LEMAG Pressotest <sup>®</sup> HP			
	Digital manometer	Digital manometer	Digital manometer
Pressure range	0-300 bar	0-700 bar	0-1000 bar
Art. No.	21900021	21900026	21900039

The test pump and all manometers can also be ordered separately
